

ROBERT M. STAHL

PHOENIX, AZ | 850-417-1871 | ROBERTSTAHL.DEV@GMAIL.COM | WWW.LINKEDIN.COM/IN/ROB-STAHLL | ROBERTSTAHLDEV.GITHUB.IO/INDEX.HTML

Software Engineer | Backend & Systems | Full-Stack Development

SKILLS

Backend / APIs: Node.js, Express, REST APIs, SQL, authentication flows

Frontend / Web: JavaScript, HTML/CSS, Bootstrap; basic React exposure

Engineering Practices: GitHub workflows, Agile development, testing support, production issue triage

CAREER HIGHLIGHTS

- Built and maintained data-driven applications and automation across multiple platforms and environments.
- Designed APIs, workflows, and internal tools supporting real users, evolving requirements, and operational needs.
- Applied software engineering principles in high-accountability environments with production constraints.

EDUCATION

Bachelor of Science, Computer Science, University of Maryland Global Campus, *Phoenix, AZ* | 2025

- **Relevant Courses:** Software engineering principles/techniques, advanced programming language, object-oriented concurrent programming, computer systems architecture, compiler theory/ design, data structures/ analysis
- **Capstone Project:** Built a full-stack web app with REST APIs, relational data modeling, and user-facing workflows
- **Academic Achievement:** Completed courses with a 3.6 GPA & earned Dean's Honor List x3, including last semester

Complete Web Development Bootcamp, Udemy, *Phoenix, AZ* | 2026 (In progress, estimated completion Feb)

- Frontend fundamentals including HTML, multi-page site structure, CSS, and Bootstrap development

EMPLOYMENT HISTORY

ServiceNow in Phoenix, AZ (Remote):

Extern | Jun 2024 — Nov 2024

- Built workflow-driven backend logic using platform APIs, scripts, and data integrations.
- Automated multi-step business processes, reducing manual work and improving reliability.
- Collaborated in Agile sprints, delivering incremental features and fixes.

United States Air Force in Tucson, AZ:

Program Management Officer (Systems & Automation) | Oct 2023 — Nov 2024

- Built SharePoint dashboards and JSON-based tools to improve data visibility for leadership.
- Automated reporting and workflows supporting 18 programs and 140 personnel.
- Conducted data validation and access audits to maintain CUI and DoD compliance.

Section Manager (Internal Tools & Data Systems) | Nov 2020 — Oct 2023

- Rebuilt a multi-user Access system using VBA and SQL, improving data integrity and role-based access controls.
- Implemented role-based controls aligned with enterprise security standards.

Unit Deployment Manager (Operational Systems & Process Automation) | Nov 2018 — Apr 2021

- Led deployment prep for 11 large-scale missions, coordinating personnel, equipment, and compliance for 9 units.
- Escalated operational risks and mitigation plans directly to executive-level leadership to ensure mission readiness.
- Conducted deployment prep inspections across base, enabling a successful major inspection with best practices.
